Soft Skills

PROFILE SUMMARY

A passionate and skilled Front-End Developer with a growing expertise in Back-End Development, specializing in creating visually captivating, responsive, and user-focused web applications. Currently pursuing a Bachelor's in Software Engineering with a focus on Artificial Intelligence, Web 3.0, and Metaverse, combining academic knowledge with hands-on project experience. Proficient in modern web technologies, including HTML, CSS, JavaScript, React, and Next.js, and experienced with UI/UX tools like Figma for delivering high-quality, black-themed, and animated designs. Known for strong problem-solving abilities, effective written communication, and the ability to manage project timelines efficiently, aiming to contribute innovative solutions in a dynamic development environment.

WORK EXPERIENCE

Front-End Developer (Freelance) 2023 - Present

• Spearheaded the design and development of responsive, high-performance websites, utilizing HTML, CSS, JavaScript, React, and Next.js to deliver seamless user experiences.

• Collaborated with clients to create visually engaging, black-themed websites with custom animations, ensuring intuitive navigation and mobile optimization.

• Focused on performance optimization and cross-browser compatibility to ensure smooth functionality across various devices and platforms.

• Integrated dynamic features such as product showcases and interactive UI elements to enhance user engagement and overall site usability.

• Delivered clean, maintainable code and adhered to best practices to ensure scalability and future-proofing of projects.
